Re: ILD 980996862
KO-61 Waste Pile Closure

Dear Mr. Kuykendall:

The September 19, 1985, letter of notification of waste pile closure, from Birmingham Bolt Company, Inc., to Gene Theios, of your office, was filed without the proper certification of closure from the owner/operator.

Birmingham Bolt Company, Inc. was the owner and operator of the KO-61 waste pile located in Bourbonnais, Illinois at the company's steel manufacturing facility. As the designated representative of Birmingham Bolt Company, Inc., assigned to coordinate and supervise the waste pile closure plan dated December 17, 1984, and based upon my continued personal involvement in all aspects of the planning, execution, supervision and documentation of the closure plan, and the certification of the Professional Engineer contracted to oversee the project, I hereby certify that the waste pile was closed cleanly in accordance with the terms of the above noted ILEPA approved closure plan.

If I may be of further information, please contact me at the above address or phone number.

Respectfully:

S.L. Morgan
Manager of Environmental Systems

cc: Mr. Gene Theios, ILEPA, Springfield
Mr. Chuck Gruntman, ILEPA, Maywood

Re: ILD 980996862
KO-61 Waste Pile Closure

Dear Gene:

As follow-up to our telephone discussion of August 30, 1985, and my letter of that date, I am forwarding to you the certification of clean closure completion issued by the examining Professional Engineer.

The pile was closed, dikes leveled, and seeded with ground cover as specified in the closure plan dated December 17, 1984. A photo taken during the last day of seeding activities is attached for your use.

Thank you for your assistance and that of your staff during our clean-up project.

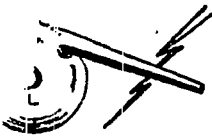

Now that we have cleanly closed the pile, when may we expect to be released from the financial assurance of performance maintained by our Irrevocable Letter of Credit?

Best regards,

S. L. Morgan
Safety Director

Re: Arc Furnace Dust
Waste Pile Closure

Dear Mr. Sartori:

This is to certify that I have inspected the waste pile site for the particulate matter which was accumulated and stored on site at Birmingham Bolt Company, Inc., Bourbonnais, Illinois. The removal and transferring of the stored material to the secure landfill at Peoria Disposal, of Peoria, Illinois, is now complete. Based on the observations of the site, review of the records and analysis of the soil samples taken and composited by Birmingham Bolt Company, Inc. personnel, the waste pile has been closed in accordance with the specifications of the closure plan for clean closure dated December 17, 1984.

Very Truly Yours,

S. P. Gary, PE
